

1 **What Is Claimed Is**

2 1. A card corner cutter including:

- 3 □ a body defining a chamber with an open upper end for receiving
4 scraps;
5 □ a first blade secured to the body and located next to the chamber;
6 □ a handle pivotally mounted on the body; and
7 □ a second blade secured to the handle.

8 2. The card corner cutter according to claim 1 wherein the chamber
9 includes an open lower end for releasing the scraps, and the card
10 corner cutter further includes a cover for closing the open lower end
11 of the chamber.

12 3. The card corner cutter according to claim 2 wherein the cover is
13 pivotally attached to the body.

14 4. The card corner cutter according to claim 3 further including a tube
15 formed on the wall of the chamber and a column formed on the cover
16 for insertion in the tube so that the cover firmly closes the open lower
17 end of the chamber.

18 5. The card corner cutter according to claim 3 wherein the cover is a
19 portion of a tray attached to the body.

20 6. The card corner cutter according to claim 5 further including a tube
21 formed on the wall of the chamber and a column formed on the cover
22 for insertion in the tube so that the cover firmly closes the open lower
23 end of the chamber.

24 7. The card corner cutter according to claim 5 further including a
25 plurality of tubes formed on the body and a plurality of columns
26 formed on the top of the tray for insertion in the tubes so that the tray

1 is attached to the body.

2 8. A card corner cutter including:

- 3 □ a body defining a chamber with an open upper end for receiving
- 4 scraps;
- 5 □ a first blade secured to the body and located next to the chamber;
- 6 □ a second blade pivotally mounted on the body; and
- 7 □ a handle pivotally mounted on the body for pushing the second
- 8 blade.

9 9. The card corner cutter according to claim 8 wherein the chamber
10 includes an open lower end for releasing the scraps, and the card
11 corner cutter further includes a cover for closing the open lower end
12 of the chamber.

13 10. The card corner cutter according to claim 9 wherein the cover is
14 pivotally attached to the body.

15 11. The card corner cutter according to claim 10 further including a tube
16 formed on the wall of the chamber and a column formed on the cover
17 for insertion in the tube so that the cover firmly closes the open lower
18 end of the chamber.

19 12. The card corner cutter according to claim 10 wherein the cover is a
20 portion of a tray attached to the body.

21 13. The card corner cutter according to claim 12 further including a tube
22 formed on the wall of the chamber and a column formed on the cover
23 for insertion in the tube so that the cover firmly closes the open lower
24 end of the chamber.

25 14. The card corner cutter according to claim 12 further including a
26 plurality of tubes formed on the body and a plurality of columns

1 formed on the top of the tray for insertion in the tubes so that the tray
2 is attached to the body.

3 15. The card corner cutter according to claim 8 wherein the second blade
4 is shaped as a triangle including a hypotenuse put in a recess defined
5 in the body.
